### **Dispenser Accessory Enables In-line Printing on WAT, Adding Another Layer of Package Security**

**Shelton, CT, March 2005** Better Packages—the number-one trusted name in water-activated tape dispensers and carton sealers for over 85 years—announces that its CodeTaper® 6 printing accessory is now available for the Better Pack® 555e series of water-activated tape dispensers. The CodeTaper 6 allows on-demand printing of custom codes, logos, dates or other messaging directly on the tape as it is dispensed. This in-line printing process is an effective and efficient means of applying codes or unique identifying characters to cartons as they're sealed, helping to increase tamper-evidence and discourage in-transit tampering and pilferage. The use of invisible ink creates custom imprints viewable only with ultraviolet light, further increasing the level of security.

CodeTaper 6 configurations are available to accommodate tape widths from 1.5 inches to 3 inches on all Better Pack models, and up to 4 inches on some models. The accessory can be purchased with the Better Pack 555e and all other Better Pack dispensers, or can be purchased as an add-on to an existing Better Pack dispenser (an adapter kit might be required).

Better Packages, based in Shelton, Connecticut, is the world's leading manufacturer of water-activated tape dispensers used for carton sealing. Its products are sold and serviced in the United States and in 20 countries worldwide. Its systems are used whenever security, strength, efficiency, productivity and a professional image are needed. Founded in 1917, the company has been headquartered in Shelton, Connecticut, since 1924. For more information, please visit [www.BetterPackages.com](http://www.BetterPackages.com).
